## (54) DATA TRANSMISSION SYSTEM

## (57)Abstract:

PROBLEM TO BE SOLVED: To automatically select the offered data contents in response to the processing capability of the data receiving destination and the circuit state for use of a WWW(world wide web) server. SOLUTION: A server 103 includes a terminal attribute part 303 which collects the capability characteristics of a client, a circuit control part 302 which collects the circuit velocities, etc. A data attribute setting part 310 sets the suitable type and quantity of data to be sent to the client at a profile 311 based on the collected client information. A data transmission agent 308 refers to a correspondence table 309 to select the data of a suitable quantity out of the offered data 301 and to send them to the client.

## **LEGAL STATUS**

[Date of request for examination]

17.12.1999

Date of sending the examiner's decision of

02.07.2002

rejection]

Kind of final disposal of application other than

the examiner's decision of rejection or

application converted registration]

[Date of final disposal for application]

[Patent number]

3683051

[Date of registration]

03.06.2005

[Number of appeal against examiner's decision

2002-14469

of rejection]

Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
